

Welcome to
Heartbeat Logistics

Seamless end-to-end logistics solutions

Integrated logistics solutions tailored to your needs

We set the new industry benchmark in the field of logistics

- **Deliver “value”, not just “cargo”:** for each order, we give individual instructions to drivers explaining the value of transported goods for the end user, and thus ensuring hyper-care while loading and unloading.
- **Control the process:** we use the latest telematics technologies allowing us to track the location of goods real time
- **Comply with the regulations:** we strictly adhere to all the requirements of EU legislation, incl.GDPR, ecological class EURO-6, drivers’ compliance with the “on-the-road rest” rules etc.
- **Guarantee professionalism:** our drivers are exceptionally experienced professionals who regularly participate in professional trainings and undergo the necessary medical examinations.

Our experience

97.5 %

Cargo delivered on time*

100 %

Customer satisfaction rate

1,500+

Tons of cargo processed

150,000+

Km covered

50+

Reliable partners

We have our own vehicle fleet as well as an extensive network of partners allowing us to maximize value and minimize cost.

* Including the pandemic time when cargo delivery often got delayed

** Results of the customer survey deployed in 2023

Delivery in a heartbeat...
